

SHORELINER

HAPPY 30TH ANNIVERSARY BOONE LAKE ASSOCIATION! *SERVING BOONE LAKE SINCE 1983*

Boone Lake Association is celebrating 30 years of working to improve the water quality and safety of Boone Lake. The picture to the left is an iconic picture of the shape that Boone Lake was in during the early eighties. Boone Lake Association was formed in 1983 and with the support of its members, has made vast improvements in the condition of the lake. As everyone on the lake knows, it is a continuous fight to keep the litter and wood debris out of the lake. BLA would like to thank all our members, past and present, along with our business and government partners. The picture below represents the Boone Lake we have all come to love and enjoy!

April 2013

BOONE LAKE ASSOCIATION NEWS

BOARD AND COMMITTEE HAPPENINGS

BLA BUDGET

As of December 31st 2012, BLA's three accounts totaled \$27,955. Of this, the Business Checking account balance was \$14,297 (which included a \$2,000 designated grant to Johnson City), the Capital Savings account balance was \$10,774, and the Boone Lake Cleanup Day account balance was \$2,884. Due to major expenses in the first 3 months of 2013, the Capital Savings account is now close to being depleted. This fund was used to purchase a new 60hp motor, a new storage facility located at Boone Lake Marina, new signage at the marinas and ramps, replacement of equipment stolen from a BLA boat, and upgraded containment barriers at our retention sites around the lake. The Capital Savings account is replenished gradually as Dues and Donations are received. 7.5% of every deposit is allocated to this account.

MEMBERSHIP NEWS

Our membership at the end of 2012 stood at 582, 48 shy of the totals reached in 2010 and 2011. Thank you to the 400+ members who have already submitted dues for 2013. Additional dues reminders will be sent out over the next few months. If you have not mailed in your dues, please do so as soon as possible.

BLA believes that increasing our membership is vital not only for funding our activities, but also increasing water quality awareness around our lake. There is power in numbers. All Boone Lake Residents (2,000+) should be members of BLA. Encourage your friends and neighbors to join us in the fight to keep Boone Lake clean and beautiful.

WATER QUALITY

The Water Quality Committee meets in April to discuss water collection testing sites around the lake for the summer of 2013. We will also discuss additional activities that the Water Quality Committee might pursue to maintain our good water quality for everyone who uses the lake. If you are interested in joining the committee or taking water samples during the summer, call Ann Harrison at 423-323-3887.

LAKE CLEANUP OPERATIONS

The BLA crew and Lake Operations Committee have been extremely busy this winter. See article on page 7 for details.

BOONE LAKE ASSOCIATION is now on FACEBOOK

Today's young people and not so young people enjoy using Facebook to connect with family, friends and businesses. Boone Lake Association has created a Facebook page to connect with existing members and hopefully interest some new people in becoming members. We will be posting pictures, stories and events often, so please visit our page at www.facebook.com/BooneLakeAssociation and "Like" our page to follow us and see what Boone Lake Association is doing for Boone Lake.

Everyone is welcome to post pictures and stories related to Boone Lake type activities, whether it be lake cleanup projects, fun in your boat, catching that big fish, or a pretty sunset on Boone Lake. We would like to hear from you!

DATES TO REMEMBER

Board Meetings – 1st Tuesday of each month – April 2, May 7, June 4, July 2 – Winged Deer Park Conference Room 7:00pm Members Welcome!

Boone Lake Cleanup Day – Saturday April 27, 2013

Questions for BLA – boonelakeassociation@gmail.com

JANUARY FLOODING

Jay Wise

Monday January 14, 2013, the forecast was not good for Boone Lake and the surrounding region. The National Weather Service was predicting heavy rain and issued an area flood watch. The stationary front stalled, producing non-stop heavy rainfall across our region that lasted for several days.

The January flood raised water levels in Boone Lake, South Holston Lake and Watauga Lake approximately 15 feet in just a few days. We were fortunate this rain system hit in January while the lake levels were down so there was somewhere for all this rain water to go. TVA did a great job managing the lake levels. However, with over 650 tributaries feeding into Boone Lake, most reaching near flood stage, there was a lot of trash, debris and logs delivered to Boone Lake on

both the Watauga and South Holston sides of the lake. The region received more than five inches of rain in a 3 day period followed by several inches of snow. At Bristol Motor Speedway and the surrounding area rainwater flooded parking lots. These floodwaters carried trash into Beaver Creek, ending up in Boone Lake near Davis Boat Dock. Boone Lake Association with the help of labor provided by Sullivan County cleaned up the area to remove much of the trash and prevent it from reaching Boone Lake.

With the water rising and snow on the ground, one of our crewmembers went to check on the BLA pontoon cleanup boat to discover it had been robbed and vandalized. Robbers broke into a locked tool box with a logging chain securing it with padlocks. Two chainsaws, a backpack leaf blower and several gas cans including the gas tank for the boat motor along with the logging chain were taken. They also damaged some of the wiring for the boat's lights. A police report was filed with the Sullivan County Sheriff's Dept. If anyone saw anything or hears of any information that may help in the investigation please contact the Sheriff's Dept. or Boone Lake Association. Like the old saying goes, "when it rains it pours"! Additional security steps have been put in place to hopefully prevent this from happening again.

Boone Lake Association will be working to clean up lower parts of the Watauga River in an attempt to remove some of the trash before it reaches Boone Lake. This along with our 14th Annual Boone Lake Cleanup scheduled on Saturday April 27, 2013 will hopefully get our lake cleaned up so we can all enjoy a fun and safe summer.

Cause
And
Effect

Old styrofoam containment barriers

BARRIER REPLACEMENT

BLA worked this winter to replace the old styrofoam barriers at our containment areas. These barriers are used to contain logs and large debris in designated coves during the summer until the water goes down and the debris can be burned or removed during the winter. The new corrugated pipe barriers are environmentally friendly and are more visually attractive.

New corrugated pipe barriers

BLA Crew works to replace barriers

14 ANNUAL BOONE LAKE CLEANUP DAY SATURDAY, APRIL 27

Come join us for the official kickoff to 2013 Season on Boone Lake! It is our opportunity to clean up our lake in preparation for boating season.

Saturday, April 27th from 9 A.M. until 3 P.M. volunteers will be at points all around Boone Lake handing out bags and gloves as needed to everyone who wants to help clean up our lake. Pick up stations will be located at:

**Boone Lake Marina Davis Boat Dock
Lakeview Marina**

**Jay's Boat Dock Sonny's Marina
Rockingham Marina**

Ramp at Bluff City Ramp at 11E

Spend as much or as little time as you can picking up litter and debris. Return the bags to the pick up stations by 3 P.M. to receive tickets good for Cash Prizes. The more you pick up, the better your chance to WIN!

4 P.M. at Winged Deer Park there will be a picnic for all the participants with FREE TEE SHIRTS, FREE FOOD and CASH PRIZES!!!

Come join the FUN!

The following article was submitted by one of our members. It appeared in the October, 2012 Seaworthy magazine.

About Electric Shock Drowning

Conscientious parents, who would never imagine letting their children go boating without a life vest or ride in a car without securing their seat belts, often have no qualms about letting a child jump off a dock into fresh water. What these parents don't realize is that if the dock has 120-volt AC power, lethal amounts of electricity could be finding their way into the water from faulty wiring on the dock or a boat. In a one week period this past July, four children and one young adult were killed in separate electric shock drowning (ESD) incidents at docks on freshwater lakes.

- At a marina on Cherokee Lake in Tennessee, a 10-year-old boy died instantly and his 11-year-old friend was critically injured and died the following day after swimming near a docked houseboat. Frayed wiring near a metal swim ladder on the houseboat was believed to have been the cause. Five adults who tried to rescue the boys were also affected and there likely would have been more fatalities had someone on the dock not had the presence of mind to disconnect the houseboat's shore power cord.
- At Dry Branch Cove on Lake of the Ozarks, a 26-year-old woman was electrocuted and died while swimming from a private dock that, according to preliminary police reports, had faulty wiring. Her two half-brothers, ages 11 and 13, felt a tingling and were saved when they swam toward a different dock.
- In a separate Lake of the Ozarks incident, an 8-year-old boy and his 13-year-old sister both died while swimming from a dock

that was also reported to have "improper wiring." An earlier test of 50 freshwater boats in the Portland, Oregon area by Kevin Ritz, the nation's foremost expert on ESD, found that 13 boats—26 percent—were leaking potentially lethal doses of electricity into the water.

How much electricity is lethal? AC current flow of around 100 milliamps (mA) of AC current will put the heart into fibrillation and death will likely follow within seconds. But lesser amounts of electricity, say, 15- 30 mA, will create muscle paralysis, and even the best swimmers will be drowned. Note that most local law enforcement investigators don't have the technical background to recognize an ESD accident and there is no post-mortem evidence available to coroners to ascertain whether electricity was involved in a drowning. It is highly likely that there are many "drowning" victims who were actually electrocuted.

When ESD accidents are identified, the parents and friends of the victims are almost always unaware that swimming from an energized dock is dangerous. In many past ESD cases, bystanders who dove into the water to save children have also become victims. To protect against ESD accidents, the American Boat and Yacht Council (ABYC) adopted standards in 2010 that require an Equipment Leakage Circuit Interrupter. (ELCI) be installed on new boats. However, not all boat manufacturers follow the ABYC standards, which are voluntary, and there is no requirement to retrofit ELCIs on older boats. There is also no standard that requires the installation of Ground Fault

Circuit Interrupters (GFCIs) at marinas and private docks. (Note that in Europe, GFCIs have been required at marinas for almost 30 years and ESD is no longer a concern.) Until such time as freshwater boats and docks are safe—and that could be decades away—the best defense is to never swim near docks with energized 120-volt AC power. Signs should be posted warning children and parents to STAY OUT OF THE WATER! The rule has to be enforced. If someone must go into the water to retrieve something lost overboard, the electricity to the dock should be shut off. Note that 12-volt electricity will not cause ESD. Nor will 120-volt current from a boat's generator unless another boat (with an electrical fault) is sharing electricity from the generator via a power cord. In saltwater, electricity does not cause ESD; saltwater is more conductive than the human body. There is not yet enough research to know at what point brackish water becomes dangerous or what distance from a possible electrical fault is safe. When in doubt, stay out.

Note: You can test to see if a boat is leaking electrical current using something called an AC clamp meter, which clamps onto a shore power cord and measures electricity going into the boat's electrical system and returning from the system. If the two numbers aren't exactly the same, electricity is in the water. Clamp meters, GFCIs and ELCIs are available at West Marine, (www.westmarine.com). If you have questions about your dock or boat's electrical system, your best source is an ABYC-certified marine electrician. To find someone who is qualified in your area, go to www.abycinc.org/certification/directorySearch.cfm

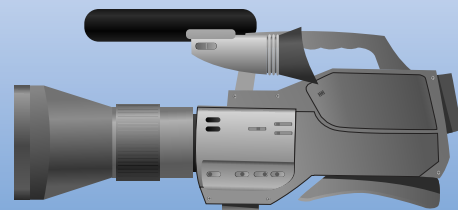

With more than 500,000 members, BoatU.S. is the nation's leading advocate for recreational boaters. Join us at www.boatus.com

EMAIL UPDATE REQUEST

Please keep BLA updated with your current email address as we are corresponding more with members via email in an effort to save money. You can send us an email at boonelakeassociation@gmail.com with any changes you may have.

Boone Lake Documentary

In January 2013, Martin Becerra, an ETSU student, contacted Russ Harrison, BLA President, for assistance with a film project concerning Boone Lake. The results of this effort can be seen at www.facebook.com/boonelakeassociation or www.boonelakeassociation.org

BLA BOARD MEETING, DECEMBER 4, 2012

BLA held its Expanded Board Meeting on December 4th 2012 at Winged Deer Park starting at 7pm. The main purpose of the meeting was to seek membership's annual approval of the slate of Officers and Board for 2013. A total of 23 members attended the meeting.

A highlight of the evening was when Martha Podren of TVA presented BLA with a check for \$2,000. This resulted from a grant application suggested by TVA earlier in the year, with the intent of steering the funds towards a suitable "water quality project". It was agreed to allocate the funds to the "Sinking Creek Wetlands Project", which will be administered by Johnson City Parks and Rec. later in 2013.

The BLA By-Laws were revised last year, as detailed in the November 2012 Shoreliner. As part of this revision, the make-up of the Board was changed to 6 Officers in lieu of 4, and 9 Board members in lieu of 5. By so doing the total number of Officers and Board was increased from 9 to 15.

The following slate of Officers and Board for 2013 was approved by the membership:

President - Russ Harrison	1st Vice President - (Vacant)	2nd Vice President - David Haaf	Treasurer - Mike Bundy
Assistant Treasurer - Larry Larson	Secretary- Connie Deegan		

Board Members: Ken Bronner, Sue Doyle, Jerry Frank, Ann Larson, Dan Nowack, Dennis Scheer, Ron Siegfried, Jay Wise, Frank Young

The 14 people above-listed were thanked for agreeing to serve. Additionally, Russ expressed gratitude to outgoing board members Mary Ann Kinch, Montie Tesky, and Reggie Lett.

BLA Officers and Board Members

TVA's Martha Podren presents a check for \$2000 to BLA's President, Russ Harrison

Bass Fishing on Boone Lake

C.B. Kinch

Fishing has been excellent on Boone Lake this winter. Most of the tournament fishermen have agreed that you can get rid of everything except the Alabama Rig and Swim Baits. Most all of the tournaments and rodeos are experiencing record catches. Five fish limits in excess of 20 pounds are consistently being weighed in. During the recent Bill Gatton Trail held at Winged Deer Park, three large mouth over six pounds were brought in to be weighed. Most of the seasoned anglers agree "this is the best winter fishing ever".

See your local bait shops on how to use the Alabama Rig. Happy fishing!

BEAVER CREEK GOES GREEN

This photograph was submitted by a BLA member who wondered what had caused Beaver Creek to turn green on Race Day weekend. It was taken from the bridge on Buffalo Road where Beaver Creek enters Boone Lake. She had witnessed all manner of things floating down Beaver Creek over the years, but was baffled by this sight.

We were pleased to be able to allay her concerns with this most unusual explanation:- As it happened this year, the March race at Bristol Motor Speedway coincided with St. Patrick's Day, so BMS received permission from TDEC to turn Beaver Creek green, using an environmentally-friendly dye.

As said in Irish song, Beaver Creek was "A Wearing of the Green"

Lake Operations 2013

Ron Siegfried

A Lake Operations Committee, consisting of eight members, was created for 2013. The new committee will add depth, structure, new programs and accountability to our Association. The committee members are Bobby Booher, Ken Bronner, Denny Devereaux, Jerry Frank, Dan Nowack, Ron Siegfried, Jay Wise and Frank Young. The committee met several times last year and established the following procedures for 2013:

During the winter months (Oct-March), our employees will work as a team cutting and burning logs at our various retention sites. From April- Sept., Joey Tester will work the South Holston side and Aaron Warren the Watauga side of Boone Lake. The Lake Operations committee has a supervisor for the Watauga side, Denny Devereaux, and for the South Holston side, Dan Nowack. The supervisors will set the schedules for the employees based on pre-established priorities.

Boat with new 60HP motor

Maintenance of our boats, motors and trailers will be the responsibility of Jerry Frank, owner of the Boone Lake Marina. Jerry will service and maintain computer records on all our boats, motors and trailers. Note: Jerry is doing this service LABOR FREE. The BLA pays for parts only!

We thank you Jerry for your generosity!

All our boats and motors have been serviced and are ready for the spring season.

All illegal activity should be reported to BLA at 423-956-6615 for action by the appropriate authorities.

The new 60HP Honda motor has been installed on the 18' Carolina Skiff by Sexton's. It is currently in use and Joey states "it runs great!"

Past practice has been for our employees to tow all floating logs to our retention sites and tie them up until the cut and burn months. This practice used valuable time and gas since we had only Marker #19 on the Watauga side. To alleviate this time and gas consuming practice, we asked for and received permission from the TVA to tie up logs next to the over 20 primitive campsites around the lake. During the winter months, we will cut the logs into

firewood and pile them at the campsites. This is a win-win for us and the campers. TVA was excited about this plan.

Additionally, we met with Dean Mimier, Johnson City Public Works Manager, at the TWRA 11E boat ramp to discuss the feasibility of their crew lifting logs from the lake bank and hauling them away. This again eliminates the long distance towing. Dean was in total agreement with the proposal. Denny Devereaux and Jay Wise are working on the details of this procedure for implementation this summer.

We have purchased and are installing 18-20 permanent signs at all TWRA/TVA ramps and marinas directing lake users to report any floating debris to the BLA via a "dedicated number" listed on the sign. The caller will simply leave a message and Lake Operations will monitor the service and initiate appropriate action.

In summary, with the incorporation of new employee procedures, regular maintenance of our boats/motors by the Boone Lake Marina, and maximum utilization of volunteer workers, we foresee BLA serving our members, major sponsors, and lake guests more efficiently and effectively thus providing a safe and clean lake environment.... The cleanest Boone Lake in history.

PLEASE REPORT FLOATING DEBRIS

(LOGS, DOCKS, BOATS, etc.) TO

Boone Lake Association

HELP KEEP YOUR LAKE CLEAN!

THANK YOU!

www.BooneLakeAssociation.org

30 Years and Going Strong

In celebrating BLA's 30 year anniversary, we would be remiss in not recognizing Ken Bronner. A founding member and past president, Ken has been active in the Association since its inception. During the past 30 years, Ken has almost single handedly managed Lake Operations. Ken remains an active member of the newly formed Lake Operations committee. In this role, he willingly shares all the knowledge he has acquired over the years. **Thank You, Ken.**

David Haaf (BLA 2nd Vice President)

David is currently Director of Bakery Deli Operations for Food City Stores. He is an Iowa native and has been a Certified Chef de' Cuisine of the American Culinary Federation since 1991 and has various degrees and extensive work history as a chef as well as serving in the military. David joined Boone Lake Association and is serving as 2nd Vice President for 2013. David's wife Mellaine and daughter Asiana moved with him to Boone Lake in 2012. David enjoys time with family, boating, water sports, working out, landscaping and a bit of golf when time allows.

Connie Deegan (BLA Secretary)

Connie is the Park Naturalist Programmer for Johnson City Parks and Rec. She has worked as head naturalist for a nature center in the Northeast for six years before taking this position. She has one daughter studying Coastal Management/Marine Science at Eckerd College. Connie also teaches part time as a motorcycle safety instructor, enjoys hiking, camping, kayaking and Loves The Water. She is very pleased to be actively working with the BLA.

Larry Larson (Assistant Treasurer)

Larry Larson is BLA's new Assistant Treasurer. He and his wife Ann recently moved to Piney Flats from State College, PA where he worked as a Program Manager for Penn State University. Larry is a thirty-six year Marine Corps veteran who is now enjoying retirement touring the area's abundant golf courses.

Denny Devereaux (Lake Operations Supervisor)

Denny and his wife moved to Boone Lake in 1987. Denny has been retired from USAir since 1993. He now works building docks and porches. Denny loves to fish, mostly stripes and crappie. He has been married 51 years to Marilyn and has 3 children, 7 grandchildren, and 2 great grandchildren.

Sue Doyle (Board Member)

Sue's family (husband Joe and two daughters) moved to Johnson City in 1998 when Joe retired from the USMC. She attended ETSU and received a MS in Environmental Health. Sue worked for TDEC in Air Pollution and Water Pollution, but left the State to work in family business. They moved to Piney Flats this year and live near the Devault Bridge Road. Sue serves as BLA's rep on the Board of Boone Watershed Partnership.

Jerry Frank (Board Member)

Jerry, originally from Pennsylvania, has been owner (along with his parents, Jerry Sr. & Kim) of Boone Lake Marina since 2008. He is an active supporter & contributor to BLA events such as Boone Lake Clean-Up Day. Boone Lake Marina maintains the BLA boats and provides assistance with other BLA projects.

Ann Larson (Board Member)

Ann and husband Larry moved to TN from State College, PA in April 2012 and make their home on Boone Lake in Piney Flats. Ann is retired from the Marine Corps. She and Larry have 3 daughters and 3 grandchildren. She is enjoying learning about all the area has to offer and stays busy with home projects, crafting and sewing.

Dan Nowak (Lake Operations Supervisor)

Dan who grew up in Upstate New York, served in the Marine Corps for 22 years and retired in the D.C. area. He then worked for a government contractor in the D.C. area as a procurement professional until retiring from that job in 2009. Dan found Boone Lake on the internet and moved onto Summer Sound road in 2010. Dan has two adult children who live out of state.

Jay Wise (Board Member)

Jay has lived on Boone Lake for most of his life in four different locations, presently on the Watauga side near Sonny's Marina. He and his wife Libby have participated in Boone Lake cleanup for many years. Jay has worked in healthcare for the last 22 years. The lake has always been a big part of his life, enjoying fishing, skiing, and wakeboarding and he looks forward to serving on the board.
